

FPS-1 FLUORESCENCE PHOTOGRAPHY SYSTEM

The FPS-1 Fluorescence Photography System is a ready-to-go camera/flash combination preconfigured for completely portable, easy-to-operate photography of fluorescent indications. Use it for documentation, reports, presentations, or whatever your need might be. This system will take you straight from zero to high quality images in no time.

- ***Complete system, ready to go out of the box***
- ***Fluorescence exposure settings preconfigured on the camera***
- ***Fluorescence photographs can be taken with the lights on!***
- ***Three camera filters to enable use with either UV or blue light***
- ***Flexible flash mount***
- ***Spare rechargeable batteries for both camera and flash***
- ***Rugged transit case with custom-cut foam***

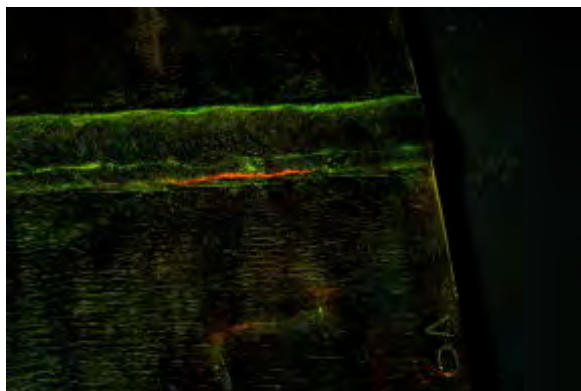

Photographs taken by a customer using the preconfigured camera settings. One photo was taken in a darkened area, the other outdoors in ambient light > 100 ft-c.
