## Model TPK-1™ TAM Panel Photography Kit

Custom holder mounts your TAM Panel to face the camera, the most convenient orientation for photography

Tripod, filter holder, and UV-blocking filter included - use them with your camera

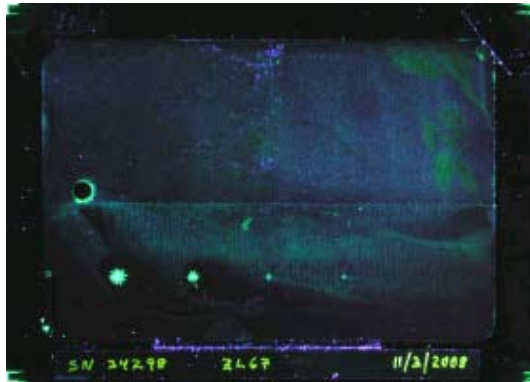

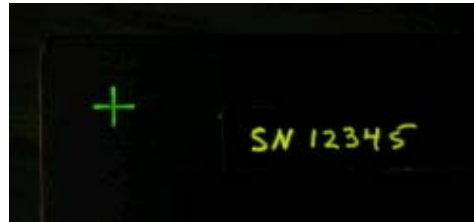

Precisely positioned fluorescent reference marks make it easy to adjust for image distortions and make 1:1 prints

Fluorescent marking pen to record pertinent image data

Photo printing service - you send us your digital image files we send back finished 1:1 prints!

Detail of a fluorescent reference mark and part of a label written with the supplied fluorescent marker

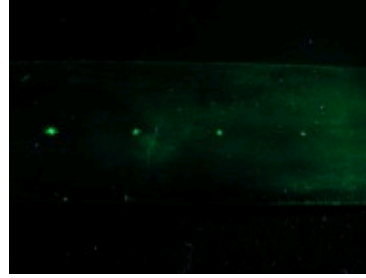

TAM Panel photograph made with the TPK-1 system, cropped to the reference marks

**UV-blocking filter** - Removes the 'purple haze' you can get with many cameras when you work with strong ultraviolet lights.

**TAM panel photographed with UV light excitation, no filter on camera**

**Same TAM panel photographed with UV light excitation, UV-blocking filter on camera**

**Print service** - BlueLine NDT can provide you with 1:1 sized prints from images taken with the BlueLine NDT TPK-1 system. Send us your digital file(s) and we will make adjustments for small camera distortions and send you back finished prints.

**System includes:**

- Model TPM-1 custom TAM Panel Photography Mount with fluorescent reference marks
- Tabletop mini tripod
- Filter holder that works with almost any digital camera
- UV-blocking filter
- Fluorescent marker pen for recording information in the image
- System instructions and photography advice

TAM panel and camera not included.
